

Medeco 7 Series[®]

Gaming Security
Without Compromise!

medeco[®]
HIGH SECURITY LOCKS

Security and convenience commonly work against each other. Systems that offer the best security are inconvenient to change, while most flexible systems are easily changed but fall short on true security. Now there's a way to achieve both security and convenience, without compromise.

The new Medeco 7 Series combines high security with a flexible and convenient removable core system.

With the Medeco 7 Series you can:

- protect your cash and equipment
- respond immediately to lost or stolen keys
- reduce machine downtime
- increase service efficiency

The Medeco 7 Series incorporates one universal lock core that fits cam locks (both clockwise and counterclockwise installations), as well as cabinet locks. This allows you to secure every point on a machine or cash drawer with a patented, high security lock. And if a key is lost or stolen, you can make a full combination change in seconds by simply replacing the core.

Quick, Secure Combination Changes

With the 7 Series, you make combination changes by replacing the entire cylinder core. The process takes seconds. It's so simple that you can often replace cores without disturbing your customers.

And while "quick-change" alternatives only provide an incremental change, the 7 Series core contains a completely new code. This means that with every change, your locking system is providing the best security possible.

Patented Key Control

Medeco's patented keys protect you against unauthorized key duplication. Only factory authorized Medeco service centers have access to the key blanks and special equipment required to cut keys. Strict control procedures ensure that no one gets duplicate keys without your permission.

Exceptionally Strong Keys

Medeco offers several different key technologies designed to thrive in the demanding casino environment. Stronger keys mean less downtime and higher revenues. A Medeco representative can help you choose the right keying system for your business.

Convenient, Flexible System

Now, a single high security core will protect every access point on a slot machine, as well as cash drawers, cash carts, table game boxes, and cash storage trays. There is never any question as to which core to stock, or carry out to the floor. Your machines will be more secure and service will be more efficient than ever.

Take the first step towards security without compromise by contacting Medeco Customer Service at 1-888-633-3261.
